Iniciativa para el Desarrollo Sostenible
de la Economía Azul en el Mediterráneo Occidental

Funded by the

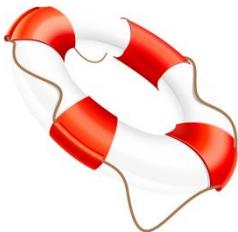

... un **instrumento de cooperación** innovador entre
los países, las regiones y las personas del
Mediterráneo occidental para facilitar el
crecimiento azul, con

10 Estados

Argelia, Francia, Italia, Libia,
Marruecos, Portugal, España y
Túnez, Malta, Mauritania

3 Objetivos

Un espacio
marítimo más
seguro

Una economía
azul inteligente y
resiliente

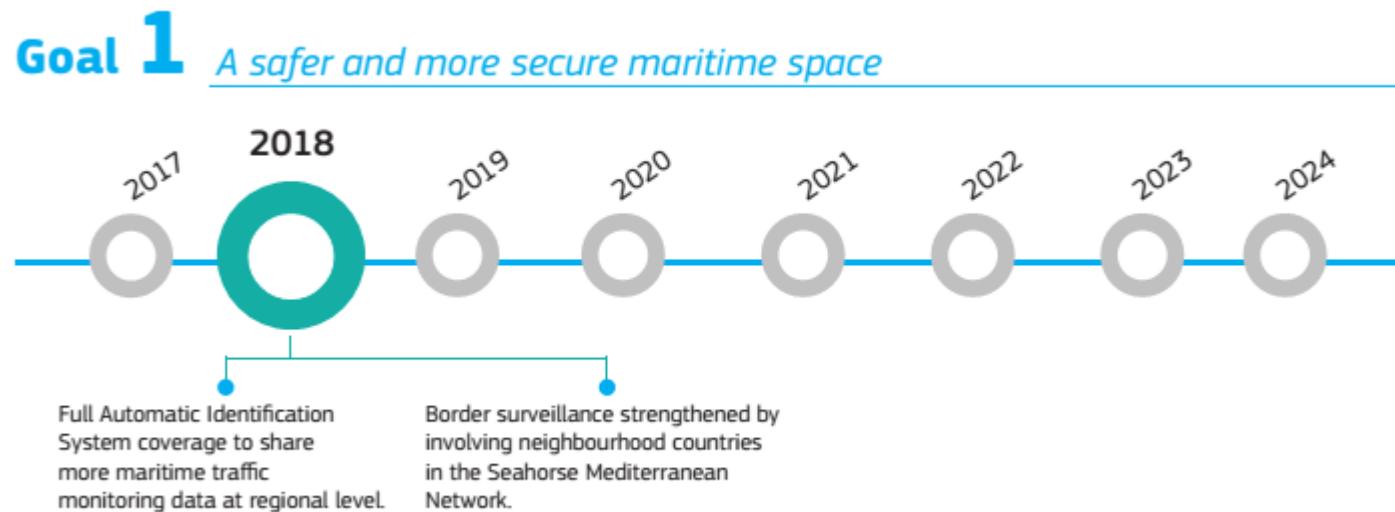

Mejor
gobernanza del
Mar

Objetivo 1: Un espacio marítimo más seguro

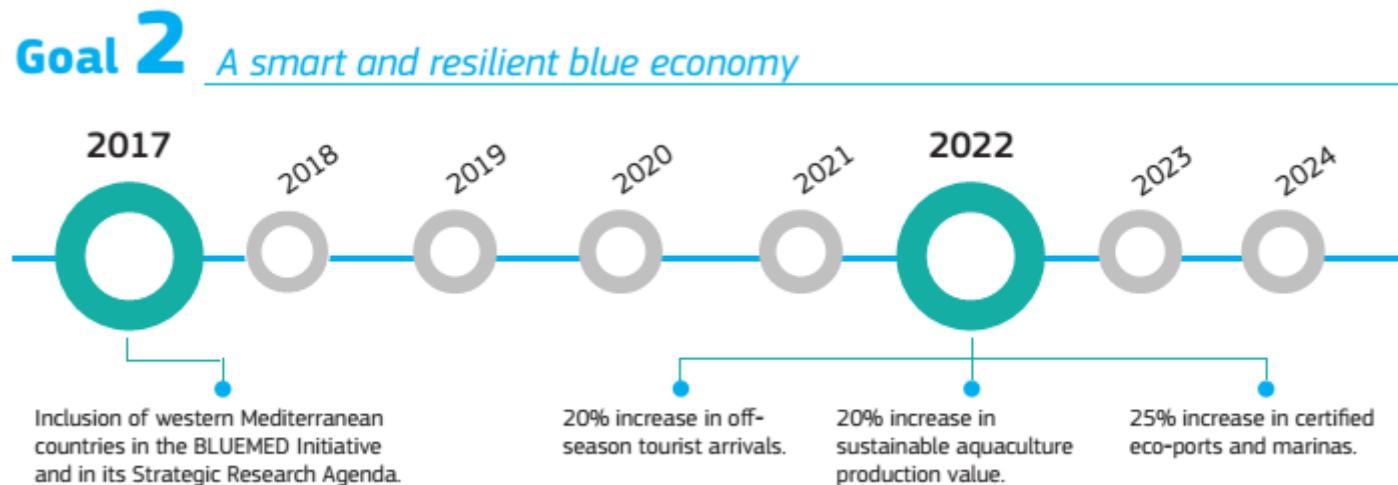

Garantizar la seguridad y la protección de las actividades en el mar es esencial para el desarrollo sostenible de la infraestructura marítima.

Economía, mantenimiento y creación de puestos de trabajo y para la correcta gobernanza del mar y las costas.

Objetivo 2: Una economía azul inteligente y resiliente

La innovación y el intercambio de conocimientos son clave para abordar el cambio generacional en el mercado laboral y hacer que la región sea más sostenible, competitiva y resistente a las crisis cíclicas y las problemáticas que puedan ir surgiendo en el tiempo. Este objetivo en gran parte se basa en iniciativas existentes, como BLUEMED y su Agenda de Investigación e Innovación Estratégica, y anima a los países socios del sur a participar de una forma más eficiente

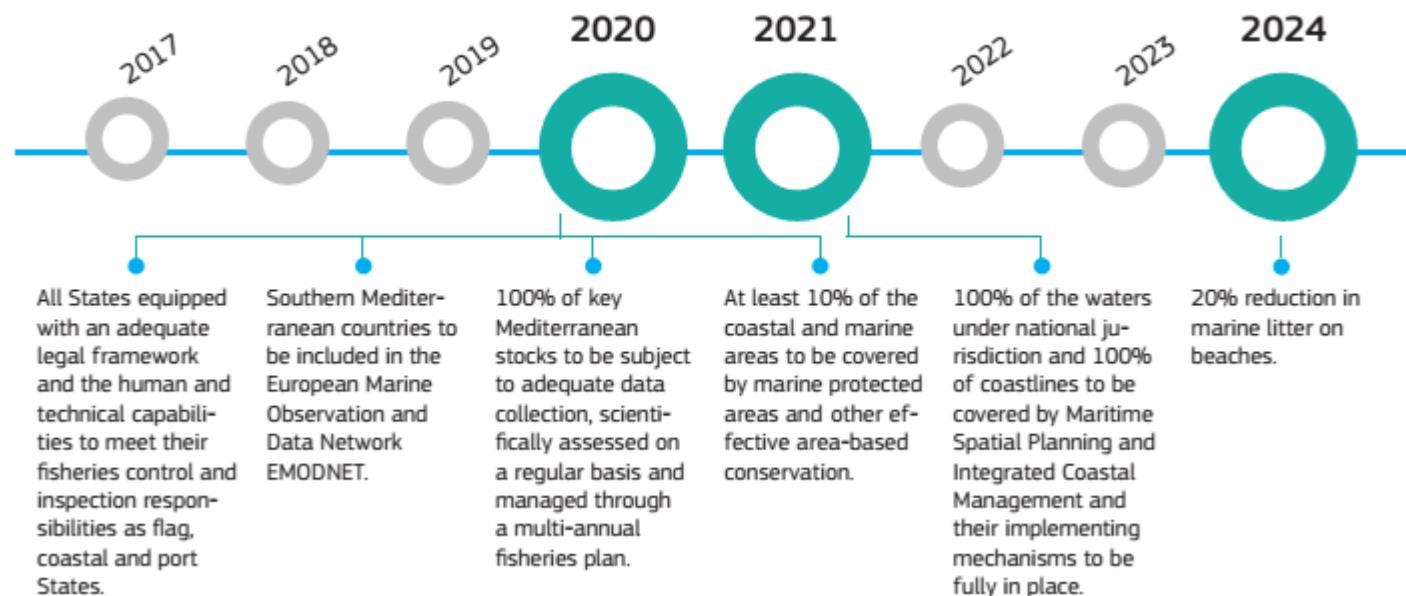

Objetivo 3: Mejor gobernanza del Mar

Conseguir unos ecosistemas marinos y costeros sostenibles al tiempo que promuevan el desarrollo socioeconómico requiere un sólido marco institucional, legal y técnico que pueda equilibrar las demandas de recursos naturales limitados y de espacio.

Goal 3

Better governance of the sea

¿Cómo nos organizamos?

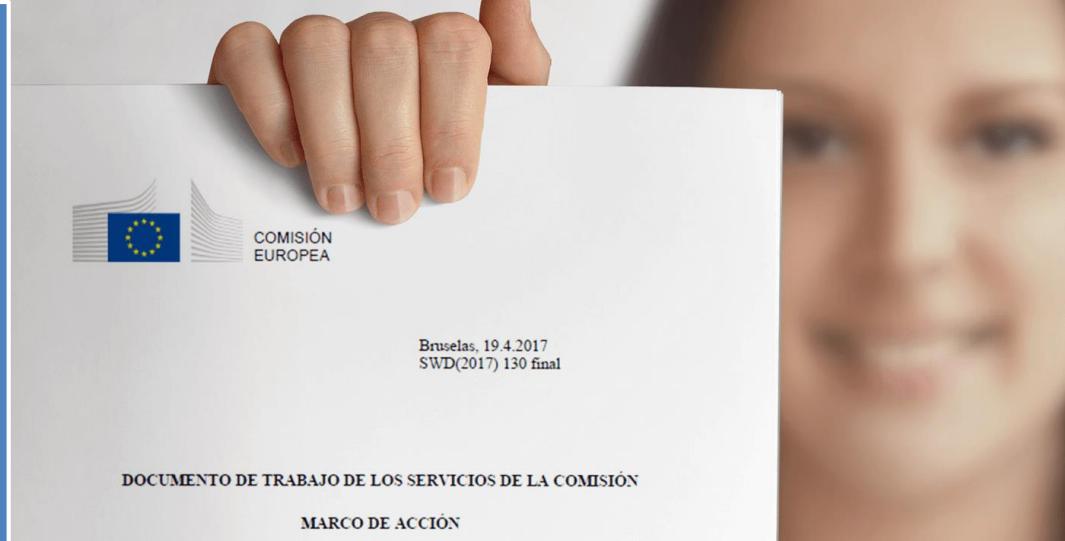

Comité Director del Mediterráneo Occidental (WMSC)

Coordinación: 2 Coordinadores Nacionales

Mecanismo de Asistencia: The WestMED Assistance Mechanism

Objetivos Generales

Apoyar la implementación efectiva del **Marco de Acción**, así como el trabajo realizado por el Comité Director del Mediterráneo Occidental (WMSC).

Asegurar una cooperación proactiva entre el Mecanismo de Asistencia (Ecorys), la Comisión Europea y EASME, el WMSC, la Secretaría de la UfM y otras partes interesadas relevantes.

Apoyar a las organizaciones públicas y privadas y sus miembros, instituciones de investigación y universidades, inversores institucionales y privados, así como a promotores y otros agentes interesados que deseen participar en el desarrollo de iniciativas estratégicas en la región (sub-cuenca) del Mediterráneo occidental.

Objetivos Específicos

Apoyo en el desarrollo de proyectos

Búsqueda de oportunidades de financiación

Diseño de una Estrategia de Comunicación

Difusión de resultados y actividades

Apoyo a la estructura de gobernanza

Asegurar un enlace con el Maritime Datahub EASME

Projectos e Ideas / España

Formulario recopilatorio de Ideas de Proyectos sobre Economía Azul de la Iniciativa Europea del Mediterráneo Occidental (WestMed)

¿Es usted un investigador, gestor, administrador, empresario o un representante de la sociedad civil interesado en el desarrollo de la Economía Azul en el Mediterráneo?

¡Ayúdenos completando nuestro formulario recopilatorio de ideas de proyectos sobre Economía Azul!

Desde la Iniciativa Europea del Mediterráneo Occidental (WestMed) y, más concretamente, desde el Eje Nacional Español, nos hemos propuesto avanzar sustancialmente en el Apoyo Internacional de Ideas de Proyectos que puedan tener o estén desarrollando aquellos agentes Nacionales interesados en la Economía Azul del Mediterráneo (investigadores, gestores, administradores, empresarios, asociaciones, organizaciones, centros de formación, centros tecnológicos, ONGs o representantes de la sociedad civil).

Es por ello que hemos desarrollado el siguiente formulario, con el objetivo de recopilar quienes son los principales agentes que actualmente trabajan en la Economía Azul en España así como cuáles son los proyectos en los que actualmente están inmersos o las ideas de proyectos que puedan tener interés en desarrollar en un futuro cercano.

The map displays the city of Valencia, Spain, with a focus on its riverine and coastal areas. Key features include:

- Rivers and Canals:** Turia River, Rio de la Plana, Riu Mica, and various canals.
- Highways:** CV-30, CV-36, CV-403, CV-407, CV-500, CV-5010, and CV-351.
- Local Streets:** Ronda Norte, Paseo de la Pechina, Carrer del Port, Avinguda del Port, and numerous smaller streets labeled with numbers like 12, 14, 18, 2A, 2B, etc.
- Neighborhoods:** Benimàmet-Beniferri, Benicalap, Benimaclet, La Saïdia, el Hué del Real, Quart de Poblet, Mislata, Xirivella, Barrio de La Luz, Patraix, Safranar, Sant Isidre, Jesús, Quatre Carreres, and Pobles del Delta.
- Ports:** Poblets Marítims and the port area near the Avinguda del Port.
- Geographical Labels:** Rascanya, Algirós, and the area around the old town (Ciutat Vella).
- Annotations:** Three green location markers are placed along the coast and riverbank. Three black circles with the number "2" are placed at specific locations: one on the riverbank near the center, one on the coast near the old town, and one on the coast further east.

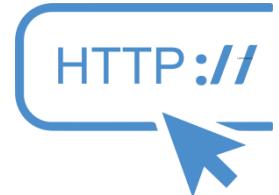

On the right side of the map interface, there are buttons for "Coordinator" (with a red location pin), "Participant" (with a green location pin), a user icon, a euro symbol, and zoom controls (- and +). At the bottom, there is a disclaimer and a "Powered by EASME" logo.

EXCELLENCE SCIENCE – Future and emerging technologies (FET)

The FET programme has three complementary lines of action:

FET Open funds projects on new ideas for radically new future technologies, at an early stage when there are few researchers working on a project topic. This can involve a wide range of new technological possibilities, inspired by cutting-edge science, unconventional collaborations or new research and innovation practices.

FET Proactive nurtures emerging themes, seeking to establish a critical mass of European researchers in a number of promising exploratory research topics. This supports areas that are not yet ready for inclusion in industry research roadmaps, with the aim of building up and structuring new interdisciplinary research communities.

FET Flagships are 1-billion, 10-years initiatives where hundreds of excellent European researchers unite forces to focus on solving an ambitious scientific and technological challenge.

FET- Proactive - <https://ec.europa.eu/programmes/horizon2020/en/h2020-section/fet-proactive>

Opening: 19 November 2019.

Deadline: 22 April 2020

Budget: 18 M€ (4 projects)

Topics:

- New techniques for creating and using dynamic models of environmental evolution
- Radically novel approaches to resilient, reliable, and environmentally responsible in-situ monitoring

Life programme

Introducción

- Dos Sub-programas
 - ✓ Environment sub-programme (75% presupuesto)
 - ✓ Climate action sub-programme (25% presupuesto)
- 4 tipos de proyectos

Type	Cofund	Description
Traditional	55% (75%)	Depends on sub-programmes (Environment or Climate Action)
Integrated projects	60%	Integrated projects combine LIFE funding with other sources of support to maximise their impact over a large area (regional, multi-regional, national or trans-national). Under the environment sub-programme, these large-scale projects implement environmental plans or strategies required by specific EU laws. They primarily concern areas of nature (including Natura 2000 network management), water, waste, and air.
Preparatory projects	60%	Preparatory projects address specific needs for the development and implementation of EU environmental policy and law. The specific topics are indicated in the annual call for proposals.
Technical assistance	60%	Technical assistance projects provide action grants and financial support to help applicants prepare integrated projects.

Life programme

Environment sub-programme

Type	Topic	Cofund	Description
Traditional projects	Nature and biodiversity	60% / 75%	Nature conservation projects in particular in the areas of biodiversity, habitats and species . It provides action grants for best practice, pilot and demonstration projects that contribute to the implementation of the EU's directives on birds and habitats , the EU's biodiversity strategy to 2020 , and the development, implementation and management of the Natura 2000 network.
	Environment and Resource Efficiency	55%	Areas of air, chemicals, green and circular economy, industrial accidents, marine and coastal management, noise, soil, waste, water, and the urban environment. The programme provides action grants for pilot and demonstration projects to develop, test and demonstrate policy or management approaches. It also covers the development and demonstration of innovative technologies, implementation, monitoring and evaluation of EU environmental policy and law, as well as best practices and solutions. The European Commission is particularly looking for technologies and solutions that are ready to be implemented in close-to-market conditions, at industrial or commercial scale, during the project duration.
	Environmental governance and information	55%	The programme supports projects in the areas of awareness raising, environmental training and capacity building, legislative compliance and enforcement, knowledge development and public and stakeholder participation . It co-finances action grants for information, awareness and dissemination projects that aim to promote awareness raising on environmental matters. This includes cooperation platforms and knowledge sharing on sustainable environmental solutions and practice

Life programme

Climate Action sub-programme

Type	Topic	Cofund	Description
Traditional projects	Climate Change Mitigation	55%	<p>Areas of renewable energies, energy efficiency, farming, land use, and peatland management. It provides action grants for best practice, pilot and demonstration projects that contribute to the reduction of greenhouse gas emissions, the implementation and development of EU policy and law, best practices and solutions. The EC is particularly looking for technologies and solutions that are ready to be implemented in close-to-market conditions, at industrial or commercial scale, during the project duration. The sub-programme also promotes knowledge sharing and integrated approaches, such as for climate change mitigation strategies and action plans at local, regional or national level.</p>
	Climate Change Adaptation	55%	<p>Areas of resilience to water scarcity, droughts, forest fires or floods, adaptive technologies for economic sectors, and safeguarding natural resources. It provides action grants for best practice, pilot and demonstration projects that contribute to increased resilience to climate change. The EC is particularly looking for technologies and solutions that are ready to be implemented in close-to-market conditions, at industrial or commercial scale, during the project duration. The climate sub-programme also promotes the development and implementation of EU policy on climate change adaptation, best practices and solutions for climate change adaptation, including ecosystem-based approaches and knowledge sharing.</p>
	Climate Governance and information	55%	<p>Areas of awareness raising, training and capacity building, law compliance and enforcement, knowledge development and stakeholder participation. LIFE provides action grants for information, awareness and dissemination projects on climate matters. This includes public and stakeholder support for EU policy-making, supporting communication, management and dissemination of information to facilitate knowledge sharing and cooperation platforms, promoting and contributing to more effective compliance with and enforcement of EU climate law, providing training and fostering the development and dissemination of best practices and policy approaches.</p>
